

First announcement - SAVE THE DATE

Next Generation BBS Seminar on

WED, 17st APRIL 2024, 14h - 18h

In-person only @ Swiss TPH

Kreuzstrasse 2, 4123 Allschwil

This event will focus on the influential application of visualizations or visualization tools. We will explore how visualizations can simplify complex topics, ultimately aiding in informed decision-making.

The Next Generation event series focus on soft-skills, professional development, and networking. The in-person meetings are specifically dedicated to support the next generation of statisticians and quantitative scientists in the pharmaceutical industry in order to succeed in the future and to become influential. We welcome people of all ages and experience levels, including those keen on understanding and supporting the endeavors of the next generation. This is a space where we can express our ideas, unite our voices, and create opportunities.

Registration will open at the beginning of March.
