

First Announcement

BBS Meeting on Covariate adjustment in clinical trials

Tuesday March 25, 2025

Face to face meeting at Novartis

9:30 – 12:00 CET

Covariate adjustment is well known and common in statistical modelling, but its use in the analysis of clinical trials is still rather limited. This half-day meeting is dedicated to covariate adjustment in clinical trials and will provide a theoretical as well practical view on the topic. Case studies will be presented and their alignment with FDA and EMA guidance on adjusting for covariates will be discussed.

Confirmed speakers include

Stephen Senn (Consultant Statistician)

Why do covariate adjustments blow up

Jack Kuipers (ETH Zurich)

To adjust or not to adjust: insights from the simplest non-trivial system of discrete variables

Dominic Magirr (Novartis)

Assumption-lean covariate adjustment for time-to-event endpoints

Venue

Fabrikstrasse 15 U3
Novartis Campus
Basel

Registration

Will open soon
