

First Announcement

BBS/EFSPI Meeting on "Registry Studies and Health Technology Assessment (HTA)"

Thursday, June 23, 2022

Free Virtual seminar

15:00 – 17:00 CET

The Basel Biometric Society (BBS) and the European Federation of Statisticians in the Pharmaceutical Industry (EFSPI) are organizing this virtual joint meeting on the use of disease and product registries in drug development and commercialization, a topic which is receiving growing interest from pharmaceutical companies, regulators, and payers/HTA bodies.

This Seminar presents new statistical and epidemiological approaches along with case studies that involve using registry data to improve accuracy in estimating and predicting outcomes in the real-world setting that aims to benefit patients and healthcare systems.

Confirmed speakers/topics to date include:

Eric Faulkner and Omar Dabbous (Novartis Gene Therapies, USA)

An open dialog on the issues faced and lessons learned with respect to the "Restore" Spinal Muscular Atrophy (SMA) registry.

Jinma Ren (Pfizer USA) and Friedhelm Leverkus (Pfizer Germany)

Considerations in design and analysis of externally controlled studies using registry data and issues in the use of registries in the German HTA process (IQWiG participation still TBC).

Entela Xoxi (Università Cattolica del Sacro Cuore, Italy)

AIFA registries: past and current & upcoming challenges.

Mei Yang (Happy Life Technology, China & USA)

Registries in China: Guidelines, trends and new technologies.

Kat Belendiuk (Genentech, USA)

FlywheelMS Case Study - A complete web-based digital registry of 5,000 patients with Multiple Sclerosis in the USA.

An additional 1-2 speakers along with final program agenda will be sent out closer to the date of the webinar.

Venue

Virtual seminar (no live meeting)
