

BBS Annual Meeting 2026

Quantitative drug development in the age of AI

Date and Location

November 10, 2026, 14:00-18:00

Basel University: Hörsaal 102 in Kollegienhaus, Petersgraben 50

Registration: Registration is required for attendance, please click here

[BBS Annual Seminar and Meeting 2026: Quantitative Drug Development in the Age of AI](#) to access the registration form.

Costs: 50 CHF for in-person attendance, free virtual attendance.

Organizers:

Baldur Magnusson (UCB), Lilla Di Scala (J&J), Aiesha Zia (Novartis), Jack Kuipers (ETH Zurich), Hans Ulrich Burger (Medical University Graz)

Objective of the meeting:

The 2026 Annual Meeting explores how AI is changing the quantitative drug developer's work and value. Presentations from AI experts, academia, industry, and the next generation will lead into a panel discussion on what we can do **now** to get ready. The question we tackle is: **how will AI reshape the role and value proposition of statisticians and quantitative experts in the future?**

Confirmed presenters: Alexandre Templier (Founder & Chair, EURAICA), Franz König (Medical University of Vienna), Peter Krusche (Novartis), and Federico Mattiello (Roche).

The meeting will be followed (17:30-18:00) by the BBS Annual Meeting. All participants are invited to join in.
